LINEA

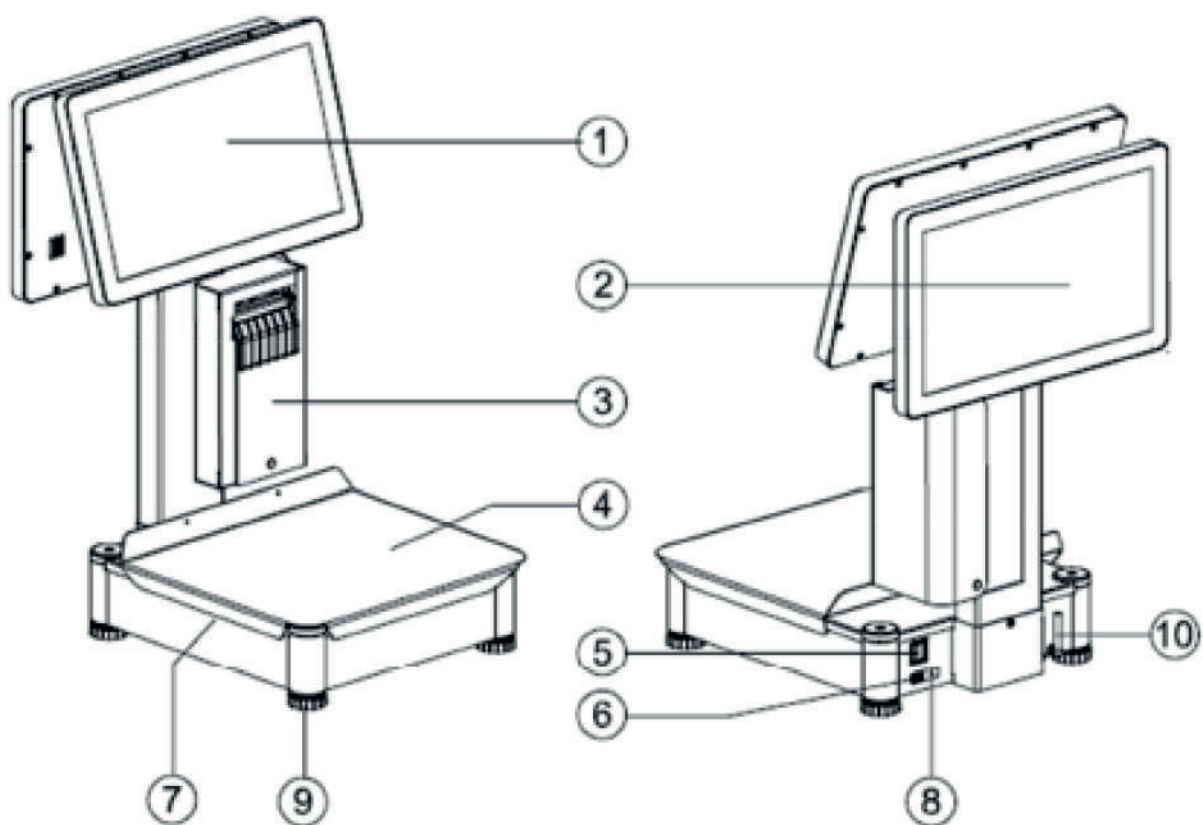

Technical characteristics:

- 3-inch thermal label printer with label dispenser, 8 dots/mm, 150 mm/sec max
- Paper width: 60mm - 80mm (max. external diameter 100mm),
- Printing on thermal label roll, continuous adhesive label roll, adhesive labels
- Operator and customer-facing screen: 15.6" Full HD resolution (1920x1080)
- Touch screen (operator screen): capacitive, anti-fingerprint treatment, suitable for use with wet fingers and latex gloves
- 1 x USB 3.0, 3 x USB 2.0, 1 x RS232C, 2 x Ethernet TCP/IP (1+1 with passthrough)
- Networking: up to 25 scales
- Wi-Fi and Bluetooth (optional)
- PC, cash register and barcode reader interface
- POS interface (optional)
- Power supply: 100-240 VAC
- External battery feed: 24 VDC +/-10%.
- Dimensions: 360mm (base width), 470mm (depth), 654mm (height)
- Available weights: 12/30kg-2/5g (standard); 30kg-5g; 12kg-2g; 6kg-1g

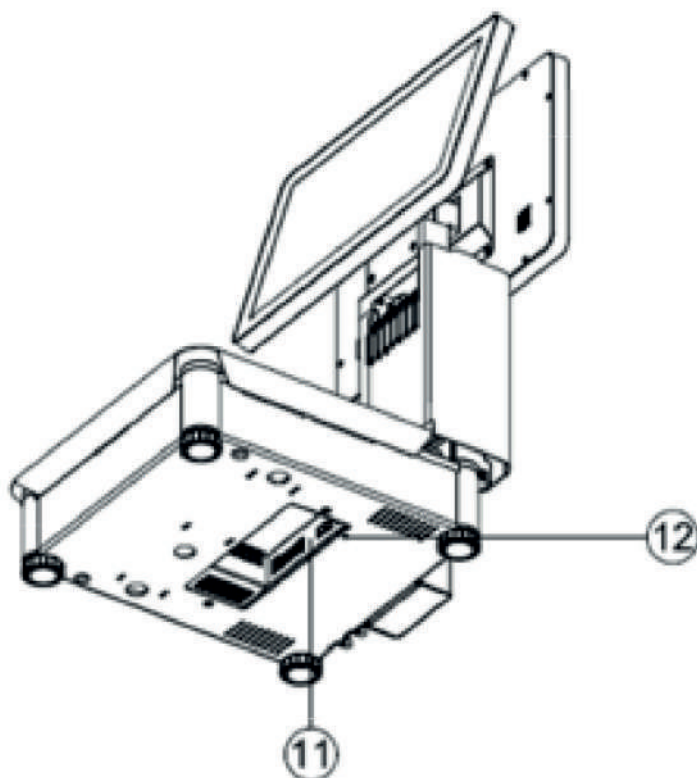

Functional Features:

- Storable PLUs: unlimited
- Receipt header: 7 lines (max. 200 characters/line)
- Article description (management): max 255 characters
- Management of PLU groups and departments according to user-settable criteria
- Automatic tare, manual tare, tare associated with PLU, programmable tare, cumulative tare with interactive management in the metrology section
- Programmable tares: 16
- Configurable VAT rates with automatic allocation
- Departments with associated VAT and user-configurable icon
- Management of users and access permissions (passwords) to the various functionalities
- Operators: 16
- Configurable operator keys with name, colour and status indication
- Configurable operator interface and customer-facing screen layouts
- On-screen position of numeric pad and metric section configurable
- Ingredient and recipe management
- Product traceability tracking
- Management of nutritional value tables for products
- Management of EAN-13, EAN-128 and QR Code barcodes
- Display in Full HD resolution (1920x1080) and customer-side display images
- Image import from web, cloud, USB with automatic format optimisation and cropping function
- Management of date of packing, expiry date and batch
- Print general totals, by operator, by article, by PLU group
- Graphic logo printing
- Printing modes: label, single receipt and consolidated receipt
- Customizing the label layout
- Filterable log of totals and transactions with reprint option
- Quick price change button with adjustable permissions (password)
- Return, discount, reopening of receipt by operator, reversal of receipt by operator
- Customisable keys
- Queue control function
- Generation of a receipt at the till with QR Code
- Advanced cloud features accessible online (management, upgrade, support, backup, app-store, etc.).
- Scales can operate offline (locally) or online (cloud-connected)
- On-screen receipt preview
- Intuitive, customisable graphical interface, ergonomic menus
- Management functionality (configuration, queries, etc.) via smartphone/tablet
- Interactive metrology section
- Fully interactive operator screen
- Help and online documentation

- 1. Operator screen
- 2. Customer-facing screen
- 3. Paper compartment door
- 4. Scale pan
- 5. ON/OFF button
- 6. USB 2.0 port
- 7. Level bubble (under the pan)
- 8. Power LED
- 9. Levelling feet
- 10. Wi-Fi antennas (option)
- 11. Connector panel
- 12. Adapter cable lock

POLESTAR TOUCH

Stainless steel version

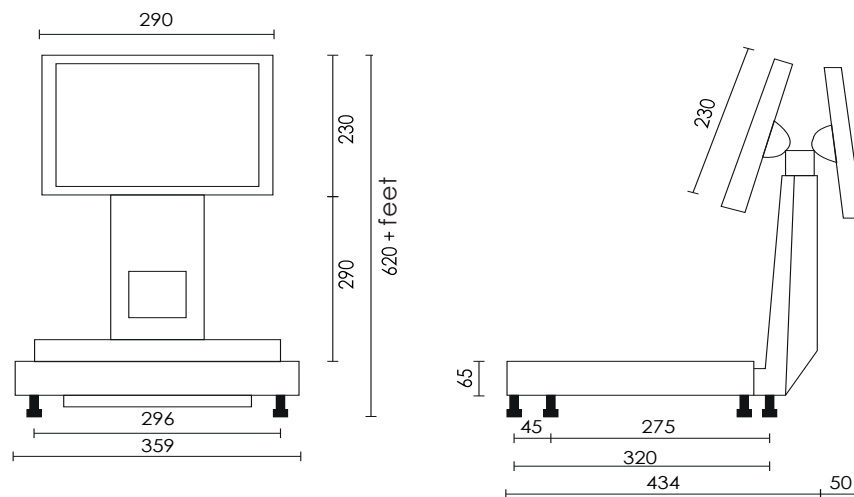

Painted steel version: red, white and black

Technical specifications:

- Capacity 12/30 kg division 2/5 g multirange
- Up to 16 operators
- Networking of up to 16 scales
- 9.999 PLUs
- Thermal printer with automatic cutter
- Equipped with 2 colour LCD displays, operator-side display 12" with resistive touch and 12" customer-side display
- Versions available with 2" or 3" printers
- Outputs: 4xUSB, 1xEthernet, 1xRs232
- Internal disk memory: 8 Gb
- RAM memory: 2 Gb
- External 24 V power supply
- Internal battery included
- Linerless adhesive paper printer kit (optionally available for 2" and 3" printer version)

Software:

- Android-based operating system
- Intuitive graphical user interface menus to simplify and speed up work
- Possibility to insert graphic logos
- Possibility of inserting product images to match the touch screen buttons
- Possibility of running advertising videos on the customer-side display

ALEX COLOR EXTRA

Technical specifications:

- 7" colour display
- Washable touchless high-speed or mechanical keyboard
- 8 dots/mm thermal printer with "easy loading" feature
- Linerless adhesive paper option
- Print speed 70 mm/s
- Paper width 57 mm
- Programmable receipt header (5 lines of 26 characters)
- Automatic date and time management
- Single or cumulative receipt
- Printing of packing date and expiry date
- Batch insertion and printing
- EAN13 barcode printing
- 999 programmable PLUs
- Change function
- Quick change of prices
- Print ingredient list associated with the PLU (12 lines of 45 micro characters)
- Re-opening receipt function
- Reverse entry function
- Semi-automatic, manual, pre-stored and associated tare
- Partial total of 8 operators on screen
- Up to 6 scales in LAN network (wired or RF)
- Scale programming from PC
- General, PLU and operator totals
- Optional radio frequency kit
- 4-8-16 operators
- Optional 12/24V external power supply
- Internal lithium battery with power supply and autonomy of about 35/40 hours
- Customer-side graphic images
- Available capacities: 30kg/5g; 12-30kg/2-5g; 12kg/2g; 6kg/1g

STELLA

Bars, ice cream parlours, confectioners' shops, hawkers, restaurants and trattorias will find their ideal scale in Eurobil Stella.

It is a very practical scale that fits well in any type of space and furnishing.

The scale focuses on reliability: the load cell system, the simple and water-resistant keyboard, new and safe.

It is available with mains and internal battery power as standard. Two types of pan (bowl and flat) to suit every need.

With Eurobil Stella your work will become easier and your sales operations will be even faster.

Technical specifications:

- Weight sensor: load cell with autozero device
- Capacities and divisions: 6/15 kg div. 2/5 g
- Weight: 4.5 kg
- Power supply: 220 VAC +10% -15% 50/60 Hz
- Dimensions: (W x H x D) 300 x 120 x 330 mm
- Keyboard: 25-key waterproof membrane
- Displays: 3 front-side and 3 rear-side liquid crystal displays (lcd) backlit
- Flat rectangular plate: (W x D) 300 x 240 mm
- Rectangular bowl plate: (W x H x D) 310x230x35
- Tare operation
- Rechargeable internal battery 4 AH / 6V autonomy of 150 hours
- Working temperature: -10°C + 40°C
- 9 direct PLUs
- CE-M approval and metrological booklet

PC-TOUCH labelling stations

LABELLING SYSTEM COMBINED WITH PC-TOUCH
ALUMINIUM BODY IDEAL FOR INDUSTRIAL ENVIRONMENTS

Mode of use:

- Graphical interface for article selection and labels on aluminium chassis touch PC
- Possibility of connection to our instruments Iscale - Fly Plus - SunEco - SunEco Alex
- Available versions, complete station consisting of: PM42 labeller with aluminium chassis touch PC, stainless steel trolley, FLY PLUS viewer and stainless steel platform
- Unlimited number of articles
- Job management via PC-touch: add, delete, article selection, convenient management of variable label fields editable directly from label editing program
- Programmable EAN13, EAN128, QR CODE barcodes

Software:

- Unlimited number of label formats customisable via included graphic label editing programme

Print speed:

- A 203 dpi/300 dpi: 100 mm/s–300 mm/s
- A 406 dpi: 100 mm/s–250 mm/s

Complete labelling station with aluminium chassis PC-TOUCH, stainless steel trolley, FLY PLUS screen and stainless steel platform in the following available versions:

SOFTWARE DI ETICHETTATURA

LabelOne

Graphic Software for Label Design

Working software

Technical specifications:

- Dual platform management
- Automatic, manual or programmed tare subtraction
- Weighing totalization on three levels (box, pallet, pallet total)
- Management and printing of selected customer header
- Programming of article archive with:
 - code, 2 alphanumeric descriptions, 2500 characters in the ingredient field, expiry date, days of staging, tare, price, EAN13 barcode, EAN128 code, automatic totalisers, traceability lists, nutrition tables
- Possibility of multiple expiry dates for the same article
- Quick and easy batch field editing
- Storing article history
- Storing customer history
- No limit on the number of articles, customers, traceability lists and label formats
- Possibility of exporting and importing data from external management software

Barcode Readers

Single-line laser scanner

Based on technology from the Voyager series, Honeywell's Data-Logic single-line laser scanner offers outstanding ease of use and excellent reading capabilities for linear barcodes up to 58 centimetres long.

Optimised for fast scanning of linear barcodes, even in the case of damaged or poorly printed codes, the Data-Logic's combination of excellent scanning performance and extended depth of field makes it an ergonomic solution ideal for applications requiring a high number of scans.

- **Extended depth of field:**

Enables easy scanning of objects at a distance and allows users to read 13 mil barcodes up to a distance of 447 mm.

- **Ergonomic design:**

Suitable for all hand types, reduces user fatigue in applications requiring a high number of scans.

- **Ease of use:**

Quick and easy stand assembly facilitates installation; ergonomic design reduces user fatigue in applications requiring a high number of scans.

- **High processing speed:**

Ensures effective object detection and automatic In-Stand detection and setup; extended depth of field makes it easier to scan objects from a distance.

Wireless area-imaging reader

- **Bluetooth wireless technology:**

makes it easy to scan all standard 1D, PDF and 2D barcodes up to 10 metres from the base (depending on the environment).

- **Superior 1D code performance:** unlike conventional laser readers, the 1D version of the Data-Logic QBT can read barcodes omnidirectionally, making it ideal for presentation mode scanning.

- **Support for future needs:**

for those who only need 1D scanning but may be interested in 2D scanning in the future, the Data-Logic QBT can be easily upgraded from 1D to 2D scanning at any time.

- **Mobile reading:**

scans coupons and tickets from the displays of mobile devices.

- **Long-lasting, on-site removable battery:**

the on-site replaceable lithium-ion battery provides over 14 hours of battery life depending on the scan volume.

RETAIL

MERCURY 24 PACKAGE SCALE MADE IN ITALY

Main features MERCURY 24 platforms

- Stainless steel red LED display
- Additional on-screen status indicators
- Accuracy class III, 3000 divisions
- Uses OIML R60-approved aluminium single point load cell with dust and moisture protection to IP65 standards (350 Ohm input resistance).
- Power supply: internal long-life battery (6 VDC/4Ah) and mains power (220 VAC - 50/60 Hz)
- Weighted summation function
- Piece-counting function
- Tare and zero reset function
- 60 cm column (h standard)
- Stainless steel pan 40x40 cm or 60x60 cm
- Oven-baked tubular structure.
- Levelling feet and level bubble.

CALYBRA BAKERY

Features:

Station for:

- Weighing of incoming raw materials (Purchase shipping document)

- Distribution (Delivery shipping document) of finished product by weight: fresh bread, pastry and deli products

Distribution:

- Weighing of finished product by weight: fresh bread, products bakery and delicatessen products.

- Operator is guided by customer or product type to the exact weighing and delivery of the order.

- Returns weighing

- Creation in the Calybra Box management system of delivery routes for each customer and/or your shop

- Allocation of a recurring order for each day of the week

- Management of holidays and/or company closures

- Automatic creation of a production order to be sent to Calybra stations for product manufacture

- Fulfillment of orders generated by Calybra Tower workstations

- Real-time issue of shipping documents for each destination (customers and/or points of sale)

Technical specifications:

- Stainless steel platform
- Dimensions 600x600mm
- Load capacity 60kg division 5g
- Stainless steel trolley

DISPLAY

- 27" TFT LCD backlit panel with LED technology
- Contrast / Brightness 300 cd/sqm
- Maximum Resolution 1080 x 1920
- Contrast ratio 3000 (typ.)

TOUCH SCREEN - Type Projective Capacitive Touch

EXTERNAL I/O PORTS

- USB 6x USB 2.0
- LAN 1x Gigabit Ethernet, RJ-45

POWER SUPPLY

- External Power Supply 24V, 6A
- 3-pin connector

PEDESTAL

- Material Painted metal with galvanised steel base
- Rear safety door

PHYSICAL FEATURES

- Operating temperature 0° ~ 60°C at 10% ~ 90% humidity
- Storage temperature -20° ~ 80°C at 10% ~ 90% humidity
- Colour Glossy white
- Dimensions (W x H x D) and net weight
- Centre unit / 42.6x88x13.5 cm
- Pedestal unit / 42.6x90x13.5 cm
- Base plate / 60x1x41 cm
- Total net weight / 36 kg
- CE-certified

EKA-BAKERY

General Information

The products mentioned in this price list comply with the European standards for electromagnetic compatibility (EMC) and, where applicable, electrical safety. They are CE marked instruments and can therefore be freely sold in all countries of the European Community or other countries.

Since they are mostly measuring instruments, they may be subject to internal regulations in each country.

Unless otherwise specified, the instruments are duly CE-certified with regard to the European regulations for non-automatic weighing instruments (NAWI) in class III.

In the case of all instruments which are required to meet special performance requirements not covered by the certification, or

which do not have metrological certification, Eurobil accepts no liability for any fraudulent use of the instrument in question by the user.

Eurobil will then subject the weighing instruments to metrological verification in accordance with the accuracy class of the instrument in question, which is then marked with plates bearing the symbols required by the EC approval certificates. They are then protected against tampering by seals of the appointed Notified Body.

The relevant declarations of conformity are then issued, which must accompany the instrument at the place of installation.

General Terms and Conditions of Sale

1) PREMISE:

The conditions of sale indicated below, will be applied to all customer orders, received and accepted by Eurobil, having as their object the sale of products, machines, consumables or other objects of Eurobil resale. The sales prices, expressed in euros, will be those stated in the price list (which are net of VAT). Special supplies will be quoted from time to time and communicated by means of a duly dated and numbered written offer.

2) VALIDITY OF THE PRICE LIST:

This price list shall remain in force until a new version is issued. Eurobil reserves the right to change it at any time without giving any prior notice, but to notify all encoded customers in writing at a later date. In this case, Eurobil will allow a short period of time (approx. 20-30 days), in which to conclude any quotations that the customer still has open negotiations.

3) ORDERS:

The customer's order must be submitted to Eurobil in writing (fax or other). Only in exceptional cases will a telephone order be considered. The order, if possible on the letterhead of the writing company and duly signed by the customer. Orders will only be considered accepted after the order confirmation has been issued by Eurobil. This will be sent to the customer, who must return it duly countersigned and reconfirmed in all parts. In the event that this does not occur, the order shall be deemed automatically accepted.

4) DELIVERIES:

The delivery dates will be those stated on the order confirmation. It is Eurobil's right to inform the customer when the goods are ready but, even if this is usually the case, we invite the parties concerned to check that this delivery date has been respected by telephoning before collecting the goods.

5) SHIPPING COSTS:

All deliveries shall be made to the consignee and, in any case, ex Eurobil, except for those agreed otherwise by mutual agreement. Where possible, Eurobil may arrange shipment via its own contracted carrier and charge the freight costs to the invoice.

6) SHIPPING RISKS:

In all cases of transport, including carriage free of charge charged on the invoice, Eurobil is exempt from any liability for theft, loss, damage or other. Only in the event that Eurobil carries out the delivery with its own personnel, Eurobil shall be liable from the Eurobil head office to the place of delivery.

7) TESTING AND INSTALLATION COSTS:

The costs of testing and installation are generally excluded and, if required, will be assessed in the final invoice.

8) WARRANTY:

Eurobil guarantees that, at the time of delivery, its products are free from defects in materials and workmanship, however, a warranty period of twelve months from the date of delivery shall apply. Excluded will be any parts which have been tampered with due to misuse by the operator, the carrier or technicians not authorised by Eurobil. Transport costs accompanying the goods to be repaired shall be borne by the customer both in the case of delivery and in the case of collection of the repaired product. Any claims for errors or defects in the products must be made in writing within eight days of receipt of the goods. Eurobil will repair or replace (if it considers it necessary) the products or their parts, excluding any other responsibility for direct damage to persons or things belonging to the customer, resulting from the use or non-use of the same. Parts replaced with new or reconditioned parts shall become the property of Eurobil.

9) PACKAGING COSTS:

Packaging, where applicable, shall be charged at cost

10) RESERVATION OF OWNERSHIP:

Goods which are delivered to the customer against his order shall be deemed to be the property of Eurobil until payment of the total agreed price and the relevant duties and taxes. The programmes granted for use to the customer remain, in any case, the exclusive property of Eurobil and/or third parties of which Eurobil is a licensee. In the event of non-payment within the terms stipulated in the order, Eurobil may terminate the order without prejudice to any of its other rights and regain possession of the goods, demanding compensation for all damages deriving from, connected with and related to this, which will be borne by the defaulting customer.

11) PAYMENTS:

Standard payments will be as follows:

- first deliveries absolutely payment by bank transfer in advance with an additional discount of 3% (valid only for prompt payment)
 - invoices of less than € 250,00 payment by bank receipt with a 30-day due date invoice end of month - regardless of the usual terms of payment
- Special terms of payment shall be taken into account and customised, depending on the customer's annual turnover and, in any case, mutually agreed upon by both parties. Exceptions or disputes shall not entitle the customer to suspend payments.

12) CUSTOMER SERVICE:

A telephone assistance service and/or on-site intervention by Eurobil's specialised technical staff is available (in this case a request must be made to the Sales Department). In this case, labour hours (at € 55.00 per hour), any spare parts and travel and travel expenses will be charged (please note that travel hours will be charged at € 70.00 per hour and € 0,65 per km travelled).

13) JURISDICTION:

For any dispute, the Court of BUSTO ARSIZIO shall have exclusive jurisdiction
